What is Happening in Corporate World

Civil Engineering: At Kiewit offshore services, currently services are being applied to Chevron Big Foot Piles and Tendons Project. As an engineer the goal is to ensure that the craftsmen are aware of the proper plan for loading, in which I have to make sure they know where the tendons are and what order they must be laid out in.-**BriAntoine Westmoreland.**

(Alpha Chapter)

Engineering Technology: At Chevron there are network control systems put in place that monitor chemical properties such as temperature, pressures, and flows known as the DOIT project. As a network engineer, there is implementation of upgrading hardware, bandwidth, and providing back up systems. Additionally, there is plenty of micromanaging due to the severity of the project to ensure positive results as supervisory control and data acquisition is implemented--sometimes portions of the project have to be completed in advance for review. There are certain modules, software codes, and cables being applied and recognized; lack of this knowledge could cost the company financial losses. Lastly, expectation is always high in the technical field, so managing through those circumstances is a must.-**Brionne Moss** (Alpha Chapter)

Chemical Engineering: At Cargill, work is being applied to critical safety device standards to ensure plant teams are working in the safest environment. Safety verification is applied to all teams within the plant creating a VERY BUSY schedule as an engineer.-**Felicia McCoy** (Alpha Chapter)

Architecture: At Tennessee State University a larger and more efficient Bio-Science building was constructed. As an intern the flow of the building plan incurred difficulty due to weather conditions. However, strategic planning lead to the completion of the project.-**Jamel Simmons** (Delta Chapter)

Mechanical Engineering: At Nissan Automotive, currently airbags are being designed that are tested to ensure proper fitting for Sedan vehicles. One important aspect is ensuring the proposed air bag design meets federal government requirements.-**Ashley Williamson** (Delta Chapter)

ANNOUNCEMENTS

#1 Texas Southern University "Beta Chapter" Growth Initiative Houston, TX

The Beta Chapter of Epsilon Gamma Iota is back!!!!. And in full effect!! Lets be sure to coordinate with Texas Southern University and enlighten their students on upcoming Epsilon Gamma Iota programs whether on or off their campus.

Chapter Dues - \$60 Dollars Annually/Chapter

Life Financial Member Dues - Please contact Faye Moore at nationaldirector@nab.eci1984.org

E-dition News 2014

1st Quarter Solicitation

Message From the President

Happy Birthday to ya...Happy Birthday! (in my best Stevie voice) Happy 30th Birthday Epsilon Gamma Iota, Inc. As your newly elected National Director I am excited to kick this term off with the celebration of this organization's longevity. I am going to keep this brief and highlight some of the main goals of this term.

Better Communication – We have to get back to our roots. Talking to each other and supporting each other as a whole. We are focused on getting the website back up and running with a long term maintenance plan and the membership database.

History – As the saying goes “you can't know where you are going until you know where you have been”...I hold us all responsible for the history that has been lost and the purpose of our traditions that make us this great organization. I am looking for the member(s) ready to step up to the vision of reclaiming our history.

Quality Intake – Times have changed, people have changed and as engineers we must evolve, re-engineer, and enhance something that is great to something that will be amazing. We need everyone's commitment to the change.

I'm excited and I hope you are too! EC.....

SAVE THE DATE!

CELEBRATING 30 YEARS!!!!

We have already kicked off the 30 year celebration with an exceptional convention. If you missed it...boy did you miss it! To keep the celebration going **each active chapter is planning celebration activities** for each individual homecoming. Please see details and contacts below.
